## Profile

Let me introduce Fadhlul Ibnu 'Abbad. I am a student from Semarang State University majoring in Informatics Engineering with a great passion for a career in programming. During my studies, I participated in the Student Creativity Program, commonly abbreviated as PKM. This program encourages students to develop products or solutions. I also have an internship experience at Telkom Test House as a developer where I was given the responsibility to develop the company's internal website. I continue to look for opportunities to contribute and learn more in the programming, digital and technology industry. I take full responsibility for the tasks assigned to me.

## Education

**SMK Telkom Purwokerto** July 2020 — June 2023  
Rekayasa Perangkat Lunak

CSS	Express JS	MySQL
JavaScript	PHP	Git

## Projects

**PDS** [GitHub](#)

This website is the result of an internship at Telkom Test House which is used to handle documents submitted by the office. This website was built using HTML, CSS, Bootstrap, JavaScript, PHP programming language, Laravel framework, and Livewire library.

[GitHub](#)

**iLibrary**

iLibrary is intended for online book borrowing in the library. This project is a Basic Competency Test or UKK task. In this exam, we as students are given the task of creating a system that can run CRUD and Authentication and can add features according to their creativity / development.

[GitHub](#)

**Travelopia**

Travelopia is a website that promotes tourist attractions in Indonesia. Here we can search and book tickets. This website was created when my team participated in a competition
